# Sharing information to promote the health and wellbeing of children and young people

In order to provide safe and effective care, information about any child or young person coming here today, will be shared with their GP, health visitor, school nurse or other agency, as it may be helpful to offer continued support.

Information is confidential and will only be shared if it will help the child or young person. If you have any concerns about information being shared, please speak to a member of the nursing team.
